

BETTER, FASTER & PAINLESS FEMININE REJUVENATION

· Juliet - The Feminine Laser ·

Juliet is a fast, painless, minimally invasive and discreet treatment for women's intimate health. Unpleasant symptoms such as genital itching, irritation, poor vaginal lubrication, dryness, stress urinary incontinence, vaginal laxity, labia deflation and pain during intercourse can be improved thanks to the cutting edge technology of Juliet laser treatment by Asclepion.

· What is Juliet Feminine Laser? ·

Different stages of a woman's life are accompanied by unavoidable experiences with regards to intimacy and sexuality. Childbirth and menopause are just two examples of events that impact the vaginal environment and can result in itching, dryness, laxity and painful inter-course.

Juliet is a laser that treats women's intimate issues and is an effective addition to, or alternative to, hormone therapy or surgery. The goal is to restore the original metabolism of connective tissue and improve the state of the mucosa by stimulating a process of neocollagenesis. This process restores the natural pH of the vaginal mucosal structure and increases its flexibility.

· What does Juliet treat? ·

VAGINAL ATROPHY AND LAXITY
URINARY LEAKAGE, DRYNESS,
ITCHINESS, LABIA DEFLATION,
PAINFUL INTERCOURSE

· Who is Juliet right for? ·

Juliet is a suitable treatment for women of all ages but is particularly effective for those who: have given birth, are going or have gone through menopause, have undergone chemotherapy or surgery, want to fight or prevent pelvic floor diseases, and want to improve the quality of their sex life.

· How does Juliet work? ·

Juliet is a laser that gently rejuvenates the vaginal connective tissue and stimulates collagen production in both layers of the vaginal walls (mucosa and submucosa layers). This improves elasticity and lubrication and, ultimately, strengthens and tightens the vaginal tissue. This "remodeling" of the vaginal walls by Juliet translates into a reduction of symptoms after the first treatment.

· How many treatment sessions will I need? ·

The number of treatments needed depends on each patient's individual needs. However, with Juliet, most women report seeing results after one session and need fewer subsequent treatments for optimal outcomes.

· How long is the treatment and when will I see results? ·

Juliet laser treatment is fast and painless. The procedure only takes 5 to 10 minutes. Patients report noticeable improvement in a week and increased improvement over the month following each session. The results are long-lasting improvement. Because aging is ongoing, maintenance sessions may be desirable.

The Juliet
treatment concept

No side effects

Suitable for
women of all ages

Minimally invasive
and fast

· What is the recovery from Juliet? ·

Healing time is short, around 3 days. Recovery involves no pain. Women typically report mild discharge the day after and just a "feeling like they had something done".

One can return to normal activities immediately. Sauna use, swimming, and sexual intercourse may be resumed three days after Juliet treatment.

· Do other treatments work well with Juliet? ·

*During treatment, we offer optional PRP Serum therapy that supports regrowth, aids in healing, and enhances the results.

*G Spot enhancement procedure, using injectable PRP or dermal filler, pairs well with Juliet Laser treatment. Enhancement is designed to make the g spot more prominent and increase it's role in sexual intercourse.

*Juliet Laser treatment can be used with bioidentical hormone pellet therapy, labiaplasty and vaginal rejuvenation surgery.
