HDL	40	HDL	61

**RICHARD BLOY, MD, A FRANCHISEE,
SHARES HIS STORY OF HOW OUR
PROGRAM CHANGED HIS LIFE!**

As a physician, my passion has always been to provide a solution for my overweight patients. As a **Medi-Weightloss™** owner, this gives me the opportunity to do two things: get results for my patients that I never could before and, as a patient myself, show them what really can be done with the Program. Last February, my personal physician was planning to put me on high blood pressure and cholesterol medicine and an antidepressant. None of that was good news to me. I went on the Program in April 2012 at 251 pounds. By August, I was 189 pounds! My fat percentage had dropped from 30% to 9%. My fat mass shrunk from 91 pounds to 18 pounds while my fat free mass rose from 160 pounds to 171[†]. My waist went from 43 inches to 34. My other health conditions improved as well.

In April my cholesterol was 251, it's now 150. Triglycerides were at 199 and are now at a healthful 59. My HDL was 40 and is now at 61, where it should be. I now just take Vita Super and no prescription medication. My motivation to lose weight and build strength was very high. I began competitive dancing, which required incredible strength, and at 251 pounds, I was sluggish. Now, at 61 years old, I feel like I have the physical strength that I had in my college years. I've been in the Wellness Phase for over five months.

My monthly weight fluctuation is about 1 pound. I drink about 180 oz of water daily. My water bottle is never empty or more than 8 feet from me. I receive positive comments every day from patients and friends. It is fabulous to feel like this. In our Southwest Florida locations, we have seen over 8,000 patients in the past five years and our patients have lost about 150,000 pounds combined! **Medi-Weightloss™** has given us the opportunity to give to our patients what had not existed before, the most successful program that we've ever seen.
