

· WHAT IS THE RECOVERY? ·

Easy. The skin can appear pink for about 1-2 days. Makeup can be worn and regular skincare products can be used after 4-6 hours. It is best to avoid NSAIDS, corticosteroids, anti inflammatory medications, ibuprofen, and Aleve during the week following treatment. These medications are known to reduce the inflammatory phase that is intentionally triggered by this treatment.

· HOW MANY TREATMENTS ARE RECOMMENDED? ·

This depends on the individual goals of the patient. Patients often choose to have a series of 3-6 treatments to achieve the rejuvenation or correction they desire. As a preventative measure against the signs of aging or a powerful refresher, 1 treatment will produce great results. For maintenance, we recommend 1-2 treatments per year to keep the skin glowing, tight and bouncy!

· WHAT IS TREATMENT SPACING? ·

If a series is needed for reversing serious aging or scarring, treatments are usually spaced 4-8 weeks apart.

· WHAT DOES THE VAMPIRE FACIAL®+RF COST? ·

Cost is 1@\$1000 or 3@\$2400. Additional areas can be added to treatment for \$350 each area each treatment.

**PRP, Microneedling &
Powerful Radio Frequency**

· DISCOVER THE SECRET TO AGELESS BEAUTY ·

VAMPIRE FACIAL® +RF

PRP SERUM COMBINED WITH MICRONEEDLING AND THE POWER OF RADIO FREQUENCY

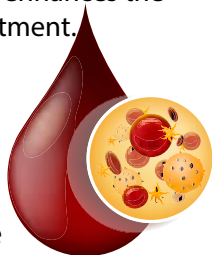

4 proven anti aging modalities in 1 treatment. The **Vampire Facial®+RF** is a patented, non-surgical, safe and effective treatment that delivers serious anti aging results. This treatment is a wonderful way to **prevent** visible signs of aging, **correct** damage and aging, or **maintain** beautiful skin.

VIVACE

Fractional Micro Needle RF

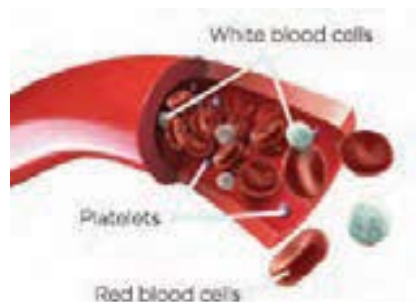

Vivace utilizes microneedling, CIT Therapy, RF/ radio frequency energy, and LED light therapy. "Collagen induction therapy", CIT, creates small entries into the dermis that cause the skin to increase collagen production which softens the appearance of fine lines, wrinkles, scars, and sun damage. RF energy tightens the skin, shrinks pores, stimulates collagen, and coagulates broken vessels to reduce redness. And LED light stimulates growth and collagen further.

Platelet rich plasma (PRP) Serum is natural and comes from your own blood. It delivers proven benefits in all areas of health and medicine. The science behind PRP and the amazing results are well documented in medical journals. PRP delivered into the dermis further enhances the results of the microneedling treatment. Collagen production, new cell growth, and blood supply are stimulated by PRP's growth factors. This creates a glow and luster to the skin which is unique to PRP. **No Injections** are needed with this treatment.

· **WHAT DOES A VAMPIRE FACIAL®+RF TREAT?** ·
The Vampire Facial®+RF treatment is customized to the needs of the client. This treatment can be used to effectively improve the appearance of:

Rosacea redness
Acne scars
Chicken Pox scars
Enlarged Pores
Loss of volume
Wrinkles
Fine lines - Skin laxity
Sun damaged skin
Brown discolorations

· **WHAT RESULTS CAN I EXPECT ?** ·

Skin that is refreshed, more youthful looking, tighter and smoother - naturally better skin. Scars, pores and wrinkles will be reduced. Although results vary based on individual factors, patients are delighted with the results!

· **WHEN WILL I SEE RESULTS?** ·

Most people notice improvements right away. More benefits can be seen as soon as 1 week. The skin will continue to improve as new cells, collagen, and elastin are produced. Full improvements are seen in 3 months.

· **HOW LONG DO THE RESULTS LAST?** ·

Results are permanent in that they reverse years of aging or rebuild scarring. You will, though, continue to age from a new, refreshed starting point. Many patients find that yearly treatments allow them to continue to see improvements in their skin and to resist further signs of aging.

· **HOW LONG DOES THE TREATMENT TAKE?** ·

Numbing cream is used for 20-30 minutes. The procedure takes about 15-20 minutes to perform.

· **IS THE TREATMENT PAINFUL?** ·

No. Numbing cream is used. This is a comfortable procedure.

· **IS THE TREATMENT SAFE?** ·

Yes. Vivace and PRP are safe for all skin types. While there are risks associated with any treatment, the risks are the lowest and serious complications have not been seen.

· **IS THERE ANY DOWNTIME?** ·

Not really. The skin is sometimes red for a few hours after the procedure. Have the treatment and go out to dinner that night.
