

· WHAT OTHER TREATMENTS CAN FURTHER MY RESULTS? ·

We highly recommend utilizing multiple modalities to achieve the most pleasing and dramatic anti-aging results. Treatments can be combined and work synergistically to maximize rejuvenation effects. Often, combined treatments can be received at the same time, if desired.

IPL – Intense Pulsed Light works to remove spots, broken vessels, redness and brown discoloration, stimulate collagen and refresh the hands.

SMARTSKIN OR DERMABLATE ABLATIVE LASER RESURFACING – Ablative lasers work to powerfully resurface the skin by removing aged lifeless skin and stimulating growth of new healthy skin, collagen and elastin.

VIVACE RF MICRONEEDLING - 3 modalities in 1 easy treatment. RF/radio frequency tightens the skin, coagulates broken vessels, clears redness and stimulates healing. Microneedles robotically deliver precise micro injuries to cause rebuilding and regrowth of healthier new skin and collagen. LED light therapy gently furthers collagen and elastin stimulation.

· DOES INSURANCE COVER TREATMENT? ·

No. Treatment is considered cosmetic and elective. Insurance companies do not cover the cost of this treatment.

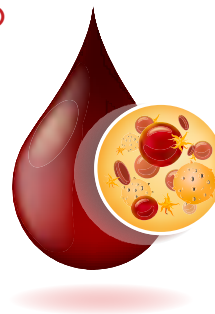

· WHAT IS THE COST OF VAMPIRE HANDLIFT®? ·

\$1500

REVAMP YOUR HANDS

AGING, WRINKLED, VEINY, OLDER LOOKING HANDS?

The **Vampire HandLift®** is a patented, non-surgical, safe, long lasting and effective treatment using PRP and hyaluronic acid dermal filler.

New collagen, elastin, and skin growth is induced, and hydration is increased by the abundant natural growth factors in PRP, platelet rich plasma. Hyaluronic acid dermal filler provides the scaffolding to support and enhance this new growth. Together, PRP and hyaluronic acid filler work to restore volume, improve texture and revitalize color of aging hands.

Benefits of **Vampire HandLift®**:

- New, hydrated tissue volume increases over the months following your treatment.
- The saggy, sunken-in, veiny appearance of aging hands begins to vanish.
- Wrinkles begin to smooth out.
- Creped, dry scaly skin is now smoother and more hydrated.
- Skin tone improves, and the hands develop a revitalized hue.
- All of which lead to a healthier, more youthful appearance of your hands.

• AM I A CANDIDATE FOR **VAMPIRE HANDLIFT®**? •

If you have visible aging of the hands -wrinkled and crepey skin, lack of volume, or too many visible veins- or are seeking more volume to plump the hands, then **Vampire HandLift®** rejuvenation is right for you!

• THE PROCEDURE •

This patented procedure is very simple and effective at anti-aging the hands thanks to power packed PRP and hyaluronic acid filler.

STEP 1: A small sample of your blood is taken similar to a routine lab test.

STEP 2: Your blood is placed in a special centrifuge to extract the highest concentration of PRP.

STEP 3: Numbing cream is placed on the hands.

STEP 4: Hyaluronic acid dermal filler is injected into targeted areas.

STEP 5: PRP is strategically injected into numerous areas.

• DOES THE TREATMENT HURT? •

No. Patients feel only a pinch with the very tiny needle injections, similar to Botox injections, and are quite comfortable.

• HOW LONG DOES THIS TREATMENT TAKE? •

Numbing and PRP preparation take about 20 minutes. The treatment itself takes only 5 minutes and is entirely comfortable.

• IS THERE DOWNTIME? •

No. The hands will be swollen and somewhat red after treatment, but this should not interfere with daily activities.

• WHAT IS THE AFTERCARE? •

Do not wash, touch or rub the area for 6+ hours after treatment. Sauna use and vigorous exercise can be resumed in 24 hours. Anti-inflammatory medications, Advil, Motrin, ibuprofen, aspirin, corticosteroids, and anti-histamines, are to be avoided in the weeks following treatment, when possible. Tylenol may be used for any post treatment discomfort. As always, protect the rejuvenated skin on your hands from the damaging rays of the sun!

• IS IT SAFE? •

Yes. Hyaluronic acid dermal filler is made to replace the hyaluronic acid your body makes naturally. It is safe and has been used for decades in aesthetic treatments. PRP is extracted from your own blood and is not shown to ever have any negative effects.

• WHEN WILL I SEE RESULTS? •

Results appear immediately. Full results will be seen in 3 months.

• HOW LONG DO RESULTS LAST? •

Results are shown to last for 1 year or more in many patients. This varies based on individual factors and lifestyle. Results cannot be guaranteed but all areas of medicine are raving about the effectiveness and visible results of PRP treatments.

• HOW MANY TREATMENTS DO I NEED? •

1 treatment provides great anti aging results. If the aging is severe, more than 1 treatment may be desirable to achieve more results.
