

bellafill®

THE FILLER THAT
OUTLASTS ALL OTHERS

bellafill®

IMPORTANT SAFETY INFORMATION

Bellafill® is indicated for the correction of nasolabial folds and moderate to severe, atrophic, distensible facial acne scars on the cheek in patients over the age of 21 years. Patients who have had a positive reaction to the Bellafill® Skin Test, have a history of severe allergies, have known bovine collagen allergies, are allergic to lidocaine, have bleeding disorders or are prone to thick scar formation and/or excessive scarring should not receive Bellafill®. The safety of Bellafill® for use during pregnancy, breastfeeding, or in patients under 21 has not been established. You may experience temporary swelling, redness, pain, bruising, lumps/bumps, itching, and discoloration at the treatment site. These side effects are usually transient and typically resolve within 1-7 days. You may experience lumps/bumps/papules that may occur more than one month after injection and that may persist. Less common side effects include rash and itching more than 48 hours after treatment, persistent swelling or redness, lumps/bumps, acne, and increased sensitivity at treatment sites. Infrequently, granulomas may occur and may be treated by your licensed physician provider. Be sure to call your licensed provider immediately if you notice any unusual skin reactions around the treatment area. Based on the 5-year Post-Approval Study on nasolabial folds with 1,008 patients, long-term safety of Bellafill® for up to 5 years has been established.

The most studied dermal filler with over 1,500 patients across 4 studies and up to 5 years

95% satisfaction after 5 years

FDA and Health Canada approved to be safe for up to 5 years

Activates the collagen in your skin to maintain a natural and youthful look

BELLAFILL WORKS ON MEN'S THICKER SKIN.

Unlike hyaluronic acid fillers, which often dissolve within a few months, Bellafill® creates a lasting improvement in your skin. Its tiny, polymethyl methacrylate (PMMA) microspheres are suspended within a base of smooth collagen gel.

Once injected, Bellafill® immediately reduces the look of smile lines. Over time, your body uses the microspheres to create a "scaffold" onto which your own collagen can develop.^{1,2} This collagen forms a foundation that adds volume to wrinkles, reducing their appearance. These natural-looking results feel soft and smooth for up to 5 years.
